

**Customer Profile**

Clough Limited, established in 1919, is one of Australia’s foremost engineering, construction and asset management groups. It is a public company providing services to the onshore and offshore oil and gas, minerals, infrastructure and property markets. Clough Limited is listed on the Australian Stock Exchange with headquarters in Perth, Western Australia.

**Contact Details**

Contact Person: Patrick MacKinlay.  
 Tel: 0061-8-6465-2000  
 E-Mail: patrick.mackinlay@intergraph.com

**Project Statement**

Clough opted for Smart Plant Foundation for its Document Management & Engineering integration needs.

For its Phase1 implementation, they required services of Consultants for configuration of workflows and get the Phase1 implemented.

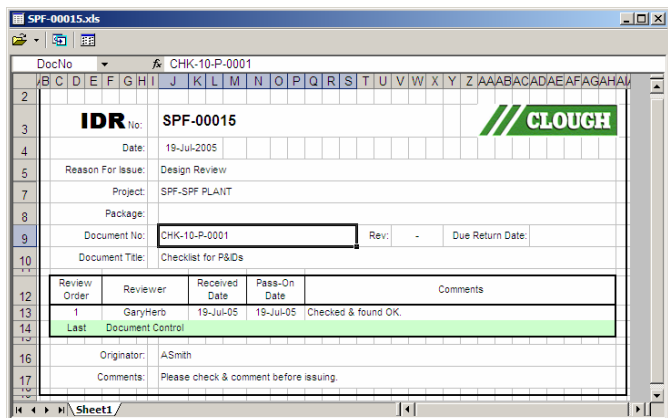

**Rolta Solution**

Rolta deputed two of its senior executives with industry backgrounds to work with Intergraph Team at Clough, Perth.

The Team worked on:

1. Configuring Internal Document Review
2. Configuring Vendor Document Review Transmittal
3. Configuring Vendor Document Review Transmittal
4. Training
5. Hand-holding the users for initial startup

**The Project**

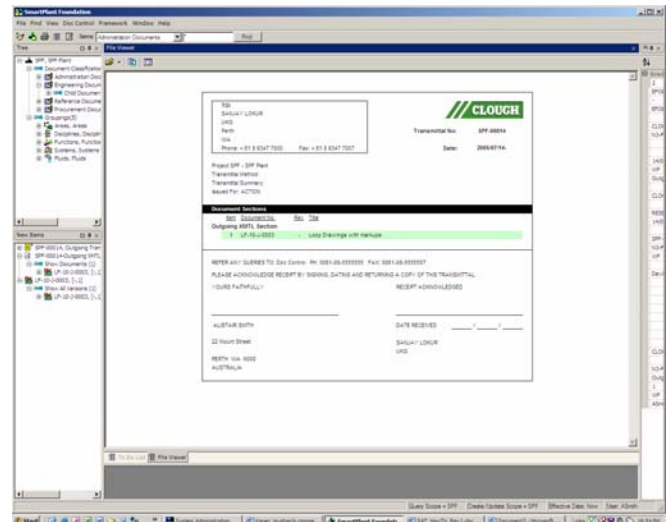

DocNo										CHK-10-P-0001

Originator:										ASmith									
Comments:										Please check & comment before issuing.									

The following activities were involved.

- Creation of workflow, response management
- Creation of Distribution Matrices
- Creation of Templates
- Expediting
- Transmittal Cover Sheet Report

Further to the configuration, Clough employees from document control, purchasing and engineering disciplines were trained with workshops that included hands-on. The feedback received from these workshops was incorporated into the System. After re-configuration, a larger audience was trained in SmartPlant Foundation Document Management System that was rolled out as part of Phase1.

**Benefits to Customer**

Phase1 was successfully rolled out at Clough with the help of Rolta consultants. Transmittals’ workflow configurations and implementation prepared the ground for further downstream work on Phase 2 and Phase 3 involving SPF TEF implementation for engineering integration.
