

PEOPLES ENERGY

Rolta is converting the Peoples Energy Corporation (PEC) gas distribution mains data for the City of Chicago. The project consisted of the conversion of 18,000 atlas paper source maps to an ESRI ArcGIS geodatabase format. The Atlas maps were georeferenced and digitized to PEC's specifications. After the Pilot was completed, four (4) deliveries were made and merged by PEC.

After the project was completed, Rolta was awarded another project to add street dimensions of valves and fittings. Also, Rolta worked with PEC to merge their as-built database with the production database. This helped lead the way for their GMOS implementation.

About Rolta

Rolta's knowledge of Geospatial Information Systems is based on our total commitment to quality and the achievement of excellence in the products and services we offer to our clients. Our organization has been globally recognized for its success in adding value to our customers and partner's businesses.

Through our investment in people, technology and infrastructure, Rolta has aggressively met emerging opportunities and enjoyed sustained financial growth. Rolta integrates its diverse knowledge and strategic alliances into innovative solutions that empower customers to address business challenges decisively and successfully.
