

PROGRESS ENERGY

Progress Energy, headquartered in Raleigh, N.C., is a Fortune 250 energy company with more than 21,000 megawatts of generation capacity and \$10 billion in annual revenues. The company's holdings include two electric utilities serving approximately 3.1 million customers in North Carolina, South Carolina and Florida. Progress Energy is the 2006 recipient of the Edison Electric Institute's Edison Award, the industry's highest honor, in recognition of its operational excellence.

Rolta was asked to deliver software Migration Tools to migrate existing facility data from their current Intergraph FRAMME-based GIS system to the G/Technology system. Rolta's professional services work for facility migration includes acquisition of data from two separate existing FRAMME installations (Carolinas and Florida) and development and delivery of a migration toolset to populate a single G/Technology target system, supporting coordinated phased deployments in both service areas. The work also includes migrating job/work orders information to G/Technology for Florida's Storms jobs.

Rolta has executed several test runs of the migration tools successfully onsite as well as in Rolta. The migration services are planned to be completed in the last quarter of 2007.

About Rolta

Rolta's knowledge of Geospatial Information Systems is based on our total commitment to quality and the achievement of excellence in the products and services we offer to our clients. Our organization has been globally recognized for its success in adding value to our customers and partner's businesses.

Through our investment in people, technology and infrastructure, Rolta has aggressively met emerging opportunities and enjoyed sustained financial growth. Rolta integrates its diverse knowledge and strategic alliances into innovative solutions that empower customers to address business challenges decisively and successfully.
